PRICE LIST

WE OFFER herein a complete list of hardy ornamental nursery stock. Our nursery of eight hundred acres affords material to meet practically every need in landscape development. Stock is well grown and supplied with a fibrous root system which is of vital importance in the success of a planting.

All material will be freshly dug. We maintain no storage cellars since the superiority of freshly dug stock is recognized generally.

With few exceptions the plant names used conform to "Standardized Plant Names" as adopted by the Joint Committee on Horticultural Nomenclature.

THE production of many of the plants in this list represents no little effort. More than a few of the items are not profitable which accounts for their general scarcity, but on the other hand they are indispensable to good landscape work.

Since we specialize in the execution of complete planting lists we aim to keep our assortment unbroken. To that end we hope you will co-operate by ordering material in reasonable assortment. We cannot always accept orders which are confined to plants that are scarce and our stock of which is limited.

Deciduous and Evergreen Trees

Shrubs and Vines

We recommend that all varieties marked with an asterisk be lifted with ball of earth and sewed in burlap. Experience has shown that the loss in these plants, which is otherwise high, is reduced to a minimum if handled in this way. This will involve extra charges, a schedule of which will be found on the last page. In all instances where "B&B" is indicated these charges are included in the printed price.

The figures printed in italics following each variety, indicate the average height of the plant at maturity.

We can also supply in limited quantity the following varieties of Japanese Flowering Cherries from the collection at Highland Park, Rochester. They are available in the 4 to 5 ft., 5 to 6 ft., and 6 to 8 ft. grades at \$2.00, \$2.50 and \$3.50 each, respectively.

Amanogawa—semi-double pale pink

Gioiko—semi-double pale yellow

Hata-zakura—semi-double white

Horaisan—double pink

Hosokawanioi—semi-double flesh

Kuramayami—double pink

Kwanzan—syn. **Sekiyama**—double deep pink

Miyako—double pink

Shirofugen—double light pink

Shogetsu—double soft pink

Sumizome—double purplish pink

Our named varieties of Japanese Flowering Cherries are grown on the Japanese type stocks. While the common practice of grafting on the European Mazzard stock is a cheaper method of propagation, it results in short-lived trees, which difficulty is overcome by using Japanese stocks.

Herbaceous & Alpine Material

All kinds marked with an asterisk (*) are adapted for the rock garden.

We are prepared to deliver from pots such kinds as are difficult to transplant or whose dormant period in the spring is brief. An extra charge of three cents per plant will be made for those so grown.
